PROJECTS

Remetric Health (Laravel)

- Remetric Health is a Remote Patient Monitoring (RPM) platform designed to help healthcare providers track patients' vital signs and health data in real time using connected medical devices. The system enables proactive care, early detection of health issues, and improved patient outcomes, especially for chronic disease

ARTdynamix® SaaS (Laravel)

- CMS which contains a drag and drop page builder functionality with widgets.
- It streamlines event scheduling, ticket sales, and CRM with analytics, supporting multi-tenant operations.

Dairy Queens (Laravel)

- Financial tracking system for Dairy Queen stores, incorporating a multi-role and permission-based architecture, along with comprehensive reporting features for enhanced financial management and analysis

Dr iQ (Laravel)

- A web-based telemedicine platform for healthcare providers and patients, allowing for remote consultations, medical records management, and prescription services.

Key Word Caddy (Laravel Api's + vue.js)

- KeywordCaddy simplifies and accelerates the process of creating SEO content that ranks high in search engines. User can import keywords to keywordcaddy and it shows the user which keywords are used and which one have not been used in your content.

Retbajri (Laravel)

- Multi-Vendor Marketplace with dedicated dashboards for Admin, Sellers, and Buyers, enabling seamless management of products, orders, and transactions across all user roles.

HRIS System for WHO/UNICEF projects (Laravel)

- HRIS manages the employee record from the job application to the resignation. This system manages the test interview marks along with offer letter and contracts generation.
